

September 2024

WATER METERS.....The Water Meter Project is complete! We understand that there is some confusion as to why only certain meters were changed. We changed meters that were no longer working or were having issues. Be assured, that we are going to continue this project and replace more meters as grant money becomes available.

FRISBEE GOLF..... The Frisbee Golf Course is complete and ready for all to enjoy at our Haskins Park location. This course was made possible with Grant Money from the State of Ohio Nature Works Grant. We encourage everyone to get out and enjoy the great outdoors with this new course.

SPLASH PAD AND PICKLE BALL COURTS..... We are moving forward with this project and are gathering quotes for the Splash Pad and Pickle Ball addition and Basketball renovation. We are applying for a T-Mobile Grant to help offset the cost over and above the Grants we received. We are also still accepting donations to help cover the cost of the project. We hope to have these projects complete for the 2025 Summer Season.

THE CITY POOL UPDATE.... The pool filters have been shipped and we should have them on-site by the time you read this letter. Work will begin on the filter room renovation, which is not expected to take long to complete. New LED lighting has been added to the pool facility for better lighting for night swimming once the pool is back in to operation. This was made possible with a Grant through *SOPEC*.

BELMONT SEWER PROJECT...Work is beginning on the Belmont Sewer Project on August 14, 2024. Three (3) manholes will be installed and we will then evaluate the Sanitary Sewer in that area. This project has been made possible with Grant Monies awarded by the State of Ohio.

The city has a lot going on this summer and we are asking for and appreciate your patience with all of our projects
