

FROM THE DESK OF THE CITY MANAGER

February has come to an end and hopefully everyone has dug out from the snow and ice that it brought us. We realize that there were many challenges with the recent weather we experienced and would like to thank everyone for being as patient as they could with our crews as they worked tirelessly thru the storms.

The Sea Wall for the Riverfront Project is really starting to take shape. Concrete for the wall is being poured and the other upgrades are coming along. Bi-weekly meetings are still being held with our Engineers and Contractor discussing any issues that arise and the funding for the project. The extreme cold weather slowed the contractors down just a bit but not for long.

The cold weather has also slowed the Water Line Project just a bit. However, they are back at it as well.

We will soon start getting the Pool back in shape for the fast-approaching swim season. Our plan, once it is drained and cleaned up, is to paint the pool floor along with the Mushroom. General maintenance for the Pool House will also be completed.

We have talked a lot about a Splash Pad. The wheels are in motion. The equipment for the Splash Pad will not be here before we open the Swimming Pool for the regular swim season. Once our Swim season is over, construction will begin and our hope is to have it open for a bit during the Fall Months while it is still warm.

Lastly, a ***HUGE THANK YOU*** to our road crews for their tireless work during the snow and ice storms trying to keep our roads passable. The Ice and snow we received along with the extreme cold temps were challenging for our crews and equipment.
